DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a method for formation of polyetherols, classified in class 528, subclass 425.
- II. Claims 15-27, drawn to another method for formation of polyetherols, classified in class 528, subclass 425.
- III. Claims 28-31, drawn to another method for formation of polyetherols, classified in class 528, subclass 425.
- IV. Claims 32-36, drawn to a method for formation of heteric polyetherols, classified in class 528, subclass 425.
- V. Claims 37-39, drawn to another method for formation of polyetherols, classified in class 528, subclass 425.
- VI. Claims 40-41, drawn to another method for formation of polyetherols, classified in class 528, subclass 425.
- VII. Claims 42-44, drawn to a method for terminal cap modification of polyetherols, classified in class 528, subclass 485.
- VIII. Claims 45-48, drawn to a method for formation of linear block copolymer polyetherols, classified in class 525, subclass 88.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 10/037.958

Art Unit: 1711

Inventions (I or II) and (III or IV or V or VI) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants or different steps of the processes or both in the claimed method for formation of polyetherols.

Inventions (I or II or III or IV or V or VI) and (VII or VIII) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on reactants and the steps of the processes to form different products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search for one of these invention is not required for another invention and vice-versa, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Application/Control Number: 10/037.958

Art Unit: 1711

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The disclosure is objected to because of the following informalities: Polyetherols in the Title and elsewhere in the specification is not recognized as chemical term.

Appropriate correction is required.

Claims 1, 15, 28, 32, 34, 36, 37, 39,40, 42- 45 are rejected under 35 U.S.C.112, first paragraph, for the reasons set forth in the objection to the specification.

In claim 32, the term" heteric" is not recognized as chemical term. Appropriate correction is required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Truong whose telephone number is 703-308-2437. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 703-308-2462. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
